

THE SILVER STATE.

Tuesday, August 21, 1883.

D. J. HADLEY is authorized to make collections for the SILVER STATE and receipt for the same.

LOCAL INTELLIGENCE.

Personal Notes.

John Catalow is down from his ranch near Jordan Valley.

A. W. Lindsey, of King's river, is in town.

Hock Mason passed through yesterday on his way to Elko to ship cattle.

T. C. Emery is in town. He says he finished stacking about 900 tons of hay Saturday.

J. A. Hannah returned yesterday from a hunting expedition in the southern part of the county, loaded with the spoils of the chase.

Another Reduction in Rates.

Station Agent McBride informs us that another reduction in passenger rates to Sacramento and San Francisco went into effect yesterday. Round-trip tickets, good for thirty days, to Sacramento, are now sold for \$35 60, and to San Francisco, for \$40 60. This is a reduction of \$18 40 on the old rates to San Francisco and back. Single-trip tickets to Sacramento have been reduced to \$21 80, and to San Francisco, to \$24 80. The old rate for a single-trip ticket to San Francisco was \$29 50.

A Green Hand.

Reports from Battle Mountain relative to the robbery of Captain Truran and John Higgins on the highway indicate that the robber was a green hand at the business. It is suspected that he went from Galena to waylay Superintendent Truran, who, it appears he knew had gone to Battle Mountain to get money to pay his men. He seemed to be as badly frightened as the men he robbed, and he missed \$1,500 in gold which was in the wagon.

The Sunday Chronicle.

The San Francisco Sunday Chronicle of August 19th is one of the finest specimens of California newspaper enterprise ever published on the Coast. It is a quadruple sheet, seven pages of which are devoted to an interesting history of Knights Templar, illustrations of the trophies to be contended for by the several Commanderies attending the Conclave at San Francisco, and other matters of interest pertaining to that gathering.

E. Reinhart & Co. vs. J. D. Bradshaw.

Judge Bigelow has rendered a decision on the points argued in the above entitled case as follows: The complaint is sustained so far as homestead land is concerned, and overruled as to the balance thereof. The plaintiffs are allowed twenty days in which to amend their complaint, if they shall so desire, and the defendant to have twenty days thereafter in which to file answer.

Repairing the Reservoir.

Superintendent Gramin, of the Water Works, had a force of men and teams at work yesterday repairing the reservoir, which was damaged by gophers. These rodents dig holes in the bank of the reservoir, and occasionally get too near the water, which then breaks through into the hole, and following it to the outside, washes away the embankment until the reservoir is drained.

Delivering Books.

S. M. Timmons is delivering to subscribers "Naval Battles, Ancient and Modern," and "On a Mexican Mustang." Both books are all they have been represented, and give entire satisfaction to subscribers. Those who have not heretofore subscribed may procure copies of Mr. Timmons. The books are elegantly bound, and will make a handsome addition to libraries.

Fat Bees.

Poley, Heilbron & Co. shipped eighteen car-loads of fat bees from this station to San Francisco yesterday. The great gathering of Knights and other visitors in San Francisco has materially increased the consumption of beef in the city.

Smoky Atmosphere.

The atmosphere is quite hazy, and the mountains look as if they were enveloped in smoke. Three or four weeks ago there was another smoky spell here, which was caused by extensive forest fires on the Sierra Nevada.

THE A. O. U. W.

Official Notice of a Separate Beneficiary Jurisdiction.

The following notice has been issued by the Grand Master Workman:

For the past three months the Ancient Order of United Workmen of this jurisdiction have been making extraordinary efforts to secure a membership of 2,000, in order to secure a separate beneficiary jurisdiction for this Grand Lodge jurisdiction, which is composed of Nevada, Montana, Utah, Wyoming and Idaho. The special incentive for the effort is the fact that when so set apart the membership will only be liable for assessments on deaths occurring within their own jurisdiction, which is conceded, by all well informed upon the subject, to be the healthiest jurisdiction in the Union.

August 15th was fixed as the date for receiving official statements from Lodges, upon which to found an application for the separation.

From reports received by Grand Master Workman J. W. Kinsley, it was ascertained that there were over 2,100 Master Workmen on the rolls of the several lodges.

The following telegrams passed between Grand Master Workman Kinsley and Supreme Master Workman Fish on the 15th, and it will be seen that this long looked for object has been accomplished:

OGDEN, Utah, Aug. 15, 1883.

M. W. Fish, Supreme Master Workman A. O. U. W., East Oakland, Cal.:

Nevada jurisdiction has over 2,000 Master Workmen in good standing, and asks for a separate beneficiary jurisdiction, subject to the laws of our order.

J. W. KINSLEY,

Grand Master Workman.

EAST OAKLAND, Cal., Aug. 15, 1883.

J. W. Kinsley, Grand Master Workman:

Your telegram received. I fix the date of separation August 15, 1883, as prayed for, subject to compliance with laws.

M. W. FISH,

Supreme Master Workman.

FROM PARADISE TO THE PLATTE.

The Changes Wrought in Twenty Years.

J. P. Holliday, who left Crutcher's ranch in Paradise Valley on the 22nd of May last, with a band of horses for North Platte City, Nebraska, writes from Laramie under date of August 15 as follows: "I am now camped under the shady cottonwoods on the Platte river, surrounded by 600 horses, which are feasting on the rich grasses. Twenty years ago I was camped in the same spot on my way to Nevada, but things have changed in that time. The cowboys have taken the place of Indians, and cattle that of buffaloes. There is one continuous herd of cattle from the Little Humboldt to the Platte river. Feed is very fine along the road, especially in Idaho, which is the best grass country I have seen, and cattle generally in good condition. Doves of cattle are coming every day from Texas and the Atlantic States, and ranges on the Sweetwater in Wyoming are stocked with them. There are very few horses in this country, and saddle horses, and, in fact, horses of any kind are in demand. There is a heavy emigration through here from Kansas to Washington Territory, reminding one of the days of '63. Our horses are in fine condition, and we have had very good luck. I will be through by the 1st of September, and will then return to Winnemucca.

Wool Shipped.

E. Reinhart & Co. shipped two car-loads of wool from this station to San Francisco yesterday. Very little wool remains here now for shipment.

Emigrants.

Yesterday one hundred and three adult emigrants, and a proportionate number of children, passed west.

Baltimore Oysters.

John Robins has just received a lot of fresh oysters direct from Baltimore, at the Oyster and Fruit Depot.

Strength for Mind and Body.

There is more strength-restoring power in a bottle of Parker's Ginger Tonic than in a bushel of malt or a gallon of milk. This explains why invalids find it such a wonderful invigorant for mind and body.

KEROSENE KINDLING.

Sad Effects of its use by a Comstock Lady.

The Virginia Chronicle says that a fire broke out in the residence of Mr. Loftus on Summit street Saturday afternoon. The firemen turned out promptly in response to the alarm and got a stream of water on the building in about eight minutes. The fire had made such rapid progress, however, that the house could not be saved, and in less than 15 minutes was almost totally destroyed. Mr. Loftus, who is a miner, working in the Union, had just returned from work. His wife had allowed the fire to go down, but on his return relighted it in order to get the dinner. This she did with the aid of a can of coal-oil, which she poured on the coals, after she had partially covered them with kindling wood. The oil took fire and soon spread all over the kitchen. Mr. Loftus endeavored to smother the flames, but in the effort his clothes caught fire and he was enveloped in the flame. The neighbors ran to his assistance, and succeeded in stripping off the burning garments, not, however, until he was very badly burned. He writhed in fearful agony until Dr. Packer, who had been sent for, appeared. In the meantime he was wrapped in flour and sweet oil by a considerate neighbor. Nothing was saved. Loss about \$500. No insurance.

NOAH'S ARK DISCOVERED.

Finding of the Ancient Vessel in a Glacier on Mount Ararat.

[N. Y. Herald.]

A Constantinople contemporary announces the discovery of Noah's Ark. It appears that some Turkish Commissioners, appointed to investigate the question of avalanches on Mount Ararat, suddenly came upon a gigantic structure of very dark wood protruding from a glacier. They made inquiries of the inhabitants (Q. 1725 in their report). They had seen it for six years, but had been afraid to approach it, because a spirit of fierce aspect had been seen looking out of the upper window. Turkish Commissioners, however, are bold men, not deterred by such trifles, and they determined to reach it. Situated as it was among the fastnesses of one of the glens of Mount Ararat, it was a work of enormous difficulty, and it was only after incredible hardships that they succeeded. The ark, one will be glad to hear, was in a good state of preservation, although the angles—observe, not the bow or stern—had been a good deal broken in its descent. They recognized it at once. There was an Englishman among them who had presumably read his Bible, and he saw it was made of the ancient gopher wood of Scripture, which, as every one knows, only grows on the plains of Euphrates. Effecting an entrance into the structure, which was painted brown, they found that the admiralty requirements for the conveyance of horses had been carried out, and the interior had been divided into partitions fifteen feet high. Into three of these only could they get, the others being full of ice, and how far the ark extended into the glacier they could not tell. If, however, on being uncovered, it turns out to be three hundred cubits long, it will go hard with disbelievers in the book of Genesis. "Needless to say," says the Pall Mall Gazette, "an American was soon on the spot, and negotiations have been entered into with the local Pacha for its speedy transfer to the United States.

Do you wish a beautiful complexion? Then use Ayer's Sarsaparilla. It cleanses and purifies the blood, and thereby removes blotches and pimples from the skin, making it smooth and clear, and giving it a bright and healthy appearance.

N. Levy & Co. are agents for Damiana Bitters.
